PROJECTS

Successfully designed and developed 14+ projects, including:

- Weather Application: Leveraging API integration and dynamic UI updates
- Password Generator Application: Implementing robust security measures and interactive UI
- Todo List Application: Crafting a seamless user experience with intuitive functionality
- Quiz Application: Building an engaging and responsive interface
- E-commerce Website: Showcasing product showcases and smooth checkout processes
- Coffee Shop Website: Brewing a delightful user experience with vibrant design

KEY ACHIEVEMENTS:

- Rapidly learned and applied modern front-end technologies to real-world projects
- Developed a strong foundation in coding principles, best practices, and problem-solving
- Demonstrated adaptability, persistence, and passion for continuous learning and growth

CURRENTLY:

- Continuing to expand skillset and explore new technologies and frameworks
- Seeking opportunities to collaborate and contribute to innovative projects and teams
